With SDS2 you can complete all your jobs in a single application at your fingertips. SDS2 is a powerful and comprehensive steel detailing tool designed to simplify the entire steel detailing process and speed up the quality control, acquisition, fabrication, ordering and delivery processes. It is a great tool for every steel worker in the construction industry. From flat, vertical and curved plates to complex angles, SDS2 includes most of the features that the most demanding steel fabricator would want in a software package. Engineering360°.com is a website designed for engineers, architects and contractors who need to build and use drawings, data, models and related content. All content is easily and quickly accessible from any location. In addition, you can upload content directly to Engineering360°.com and share your project work with other Engineers 360°.com users. Steel Detail Software, Inc. (SDS2) was founded by Steve Tully, a master steel worker who is also a seasoned software developer and design engineer. When he developed SDS2, Steve wanted to create a software solution that would help solve the problems that he was experiencing in the steel construction industry. He also wanted to create a product that would be useful to other steelworkers around the world. In addition to being an award-winning steel detailing software, SDS2 is also a powerful and

comprehensive steel design and analysis software. It is one of the first and only software packages that combines steel fabrication, data acquisition, analysis, design and management in one convenient package. SDS2 works with any CAD system, whether it is AutoCAD, MEP Design or Maxon. Software Description: Formstar offers best-in-class content management and online editing for websites and intranets, with intelligent social commenting and group commenting, a collaborative news and events manager, and an industry-leading image gallery. For office management and collaboration, Formstar offers desktop web publishing, Web 2.0 style social collaboration, and a large community of thousands of members. Fusion CRM solutions enable businesses to engage with customers in a more personalized way.
